

We are excited to welcome your child to the Upper Elementary at the Wyckoff campus! It will be a great year. We do have a few suggestions to prepare the students for fourth grade. Over the summer they should read and practice multiplication facts and cursive handwriting.

- The EC website has details for a story cube book response and a summer reading log.
- Cursive handwriting practice will allow for fluency and accuracy when writing.
- Mastery of multiplication facts from 0-9 is essential for the fourth grade math curriculum. The multiplication facts will be used in place value, multiplication, division, fractions, geometry, and decimal units. Summer is a perfect time to master the facts for a great start in fourth grade.

Additionally, your child can continue to practice reading and math skills on RAZ Kids, Xtramath and IXL. To help your child with writing skills, writing stories or journal entries about special summer activities is always a great option.

Thank you,
Mrs. Hoogerhyde
